

## Learn More About Radon in Residential Dwellings

## COMING WINTER 2017

### Become a Certified Radon Professional

*Attention home inspectors, building inspectors, builders, renovators, building owners, building managers, contractors, environmental consultants, public health officials, real estate professionals, indoor air quality professionals and non-profit health advocacy organizations or for anyone wanting to become a Certified Radon Measurement Technician.*

### RADON MEASUREMENT COURSE

*Presented by: Marcel Brascoupe  
C-NRPP Certified Radon Mitigation Specialist*

This exciting and fast paced two-day workshop will provide participants with an in-depth understanding of radon, its scientific properties and known health effects, current statistics of Canadian radon exposures, knowledge of Health Canada's radon measurement protocols including placement and retrieval of radon measurement devices, understanding of C-NRPP approved devices, knowledge of the proper interpretation of results obtained in residential settings and some basic radon entry and mitigation concepts.

#### Dates & Location

Moncton – January 16-17 (English)

Cost: \$550 + HST (Includes Exam)

Registration Deadline: December 16, 2016

### C-NRPP RADON MITIGATION COURSE

*Presented by: Marcel Brascoupe  
C-NRPP Certified Radon Mitigation Specialist*

Marcel Brascoupe

Marcel Brascoupe is the owner of MB Radon Solutions and a certified general construction contractor with a background in electrical and HVAC systems who has been specializing in the installation of radon mitigation systems throughout the province of Quebec since 2008. Marcel has been involved in providing hands-on training to work crews since 2009 and more recently, in a formal classroom environment. Marcel is also a founding Board Member of the Canadian Association of Radon Scientists and Technologists (CARST) and has contributed to Health Canada's technical guidance document titled "Reducing Radon Levels in Existing Homes: A Canadian Guide

*(The Radon Measurement Course is a Pre-Requisite to this Course)*

This 3-day course will cover topics related to Health Canada's "Guidelines for Reducing Radon Levels in Existing Homes", "A Canadian Guide for Professional Contractors" as well as design, installation, and trouble-shooting of radon mitigation systems and includes hands-on training, worker health and safety and will prepare participants for preparation for the C-NRPP Certification Exam.

**Dates & Location**

Moncton – January 18-21, 2017 (English)

Cost: \$650 + HST (Includes Exam)

Registration Deadline: December 16, 2016

## **C-NRPP RADON INSTALLER'S COURSE**

*Presented by:* Marcel Brascoupe

C-NRPP Certified Radon Mitigation Specialist

This 6-hour course will provide information on how to install a roughed in, passive or full mitigation radon system in a new home. The course will provide details on how to decide which system to install and how to perform this "roughed-in" installation and meet the National Building Code of Canada.

The 2010 National Building Code adopted in New Brunswick on January 2015 requires that all new homes be constructed in such a way as to minimize soil gas ingress including Radon into the home and make it easy and economical to correct should it be determined that there is a Radon problem after occupancy.

**Dates & Location**

Moncton – January 22, 2017 (English)

Cost: \$350 + HST (Includes Exam)

Registration Deadline: December 16, 2016

for Professional Contractors" along with several scientific papers on the subject of radon mitigation.
